

# REVIEW IT SCHOLARSHIP

## **STEPS TO WRITING A GOOD MOVIE REIVIEW:**

### **STEP 1:**

Select a movie for review. We highly recommended choosing one of your favorite movies of all time.

### **STEP 2:**

Watch the movie at least twice. Note that it is practically impossible to write a good movie review having watched the show only once.

### **STEP 3:**

If possible, read about the story behind the film. Was it based on real-life events? Was it based on a book? Make notes of any interesting facts about the production process, the basis for the story, the cast and the crew, the budget and the shooting location.

### **STEP 4:**

While watching the movie, make notes of important scenes or distinctive performances of the characters.

### **STEP 5:**

Write an introduction where you include all the basic information about the movie. This should include: Name of the Movie, The Director, Main Cast and Characters, Year the Movie was released, and Budget of the Movie.

### **STEP 6:**

Write the main body. Analyze the story on the whole, the performance of the actors and vision of the director.

### **STEP 7:**

Make a conclusion. State what the general perception of the film was by the audience and the critics. Then express your personal opinion and include your rationale.
